

## REBECA PRACTICE: DATA SCIENTIST SOLUTIONS

### SOLUTION TO TASK 1

```
In [ ]: # Import Movies Data from Vega Datasets
        from vega_datasets import data
        movies_data = data.movies()
```

```
In [ ]: # Display the Dataframe
        movies_data.head()
```

```
In [ ]: # Assign column names variable
        col_names = movies_data.columns
        col_names
```

```
In [ ]: # Check the data types
        movies_data.dtypes
```
